Market Comment

Overview

The first half of 2024 witnessed a solid performance by global stock markets, up 11.6%, driven by a positive outlook for the US economy, the anticipation of interest rate cuts, and signs of economic resilience in Asia. Strong gains across many asset classes and geographies reflected a resurgence in investor confidence amid evolving economic dynamics. Growing enthusiasm surrounding advancements in Artificial Intelligence (AI) continued to fuel stock markets in the US and Taiwan. The US market was also supported by continued solid first quarter earnings, led by a small group of high-growth mega-cap stocks. Concerns about persistent inflation, solid economic data and the Fed's diminished appetite for rate cuts did not cause panic among market participants. The market is currently pricing in two rate cuts from the Fed this year. Trade tensions between the US and China escalated, with tariff increases on imports of a range of Chinese goods (e.g. semiconductors, solar cells, electric vehicles) announced during the period. The International Monetary Fund (IMF) revised its forecast for US GDP growth this year to 2.7%, above the levels expected for other developed market peers. With Donald Trump the Republican nominee, Joe Biden stepping aside and Kamala Harris the Democratic nominee, US election news is starting to dominate the headlines, which could lead to more volatility. In China, we have seen robust economic data with consensus GDP estimates for 2024 close to 5%, although real estate sector issues remain unresolved despite further government support measures.

Emerging markets underperformed developed markets with MSCI EM returning 7.6% while developed markets were up 11.7%. The main reason for this was the uninspiring performance of benchmark-heavy China with -3.3%, where we observed a weak first quarter due to ongoing geopolitical tensions with the US and some recovery in the second quarter after the introduction of policy stimulus measures and the announcement by the authorities of initiatives such as tighter supervision of company listings, delistings, and dividend payouts to revive investor confidence in the stock market. The real estate sector received further support, with local authorities starting to buy apartments and rent them out at affordable rates. Amongst other markets, Taiwan emerged as a standout performer, with its index posting significant growth (+22.1%), driven by sustained investor enthusiasm for artificial intelligence (AI) and chipmaker TSMC. India also outperformed, with the index rising by approximately 10.0%, supported by the strength of the local currency ahead of general elections in which the ruling party won, albeit with significantly less support than in previous elections and falling short of a majority in the lower house of the parliament. Moreover, we witnessed mixed performance of the LatAm countries, with Argentina surging +53.7%, Peru +18.1% and Colombia +12%, while Brazil and Mexico corrected -19.5% and -13.9%, respectively. In Mexico, the ruling party won the elections by a wide margin, raising fears that the ruling coalition will pass controversial constitutional reforms without the necessary support from the opposition. In Brazil, the stock market was dragged down by state-owned enterprises (SOEs) as the CEO of Petrobras was replaced by a government appointee. In Eastern Europe we saw solid performances from Hungary (+11.5%) and Poland (+9.5%). Turkey was one of the strongest markets with a +31.1% performance on the back of more orthodox policies introduced by the central bank.

Frontier markets underperformed developed and emerging markets returning +5.9% during the period. On one hand we note the good performance of Kenya (+52.8%) and Pakistan (+26.6%), together with the strong performance of European frontier markets: Romania +20.1% and Slovenia +25.1%. On the other hand, Egypt corrected by -27.4%, Bangladesh -20.3% and Nigeria -17.5%. In Egypt, we have witnessed currency devaluation, which has put pressure on the stock market. Looking ahead, positive developments in Egypt and Nigeria offer grounds for optimism, with transformative policy measures and international support paving the way for potential growth opportunities. In Vietnam, an anti-corruption drive affected the market throughout the period, closing at +6%.

Outlook

Sentiments remain constructive, as we move into the second half of the year. Key developments to watch will be inflation in the major markets, the path of interest rate cuts by the major central banks and the US presidential election. In emerging markets, we remain constructive on China, with a possible bottoming out of the property sector and hopefully less geopolitical noise and Taiwan, which is a pure-play exposure to the global chip cycle. Among other emerging markets, we like India, which is a classic structural growth story, and Korea, where a corporate value up programme that incentivises companies to pay higher dividends will hopefully lead to a re-rating of the market. On the other hand, we expect the poor sentiment to persist in Latin America for the foreseeable future, and our focus is mainly on stock picking among companies with strong balance sheets and earnings visibility. We remain bullish on Eastern European markets, which offer attractive valuations and strong earnings potential, particularly in Poland, Hungary and Turkey. In addition, the potential resolution of the Russia/Ukraine conflict could further boost investor confidence and support equities in the region.

Note 7 - Subscription duty ("Taxe d'abonnement")

The Fund is governed by Luxembourg law.

Pursuant to the legislation and regulations in force, the Fund is subject to an annual subscription duty ("taxe d'abonnement") of 0.05% which is payable quarterly and calculated on the basis of the net assets of each Sub-Fund on the last day of each quarter.

The rate of this tax is reduced to 0.01% of the value of the net assets for Sub-Funds or Classes of shares reserved for institutional investors.

According to Article 175 (a) of the amended Law of 17th December 2010, the net assets invested in Undertakings for Collective Investments already subject to the "taxe d'abonnement" are exempt from this tax.

Note 8 - Securities lending

The Fund can carry out securities lending transactions.

The table below shows for the different Sub-Funds at the date of the financial statements:

- the global valuation of the securities lent ("Securities Lending")
- the valuation of the cash received as collateral
- gross income, costs and net income incurred during the year in connection with the securities lending transactions.

Sub-Funds	Currency	Global valuation of the securities lent to the following counterparties						Valuation of the cash collateral *
		Barclays Capital Securities Limited	Citigroup Global Markets Limited	HSBC Bank Plc	Merrill Lynch International	Morgan Stanley & Co. International plc	Total	Total

* The cash collateral is an off-balance sheet item.

Note 9 - Swing Pricing

A Sub-Fund may suffer a reduction in value as a result of the transaction costs incurred in the purchase and sale of its underlying investments and the spread between the buying and selling prices of such investments caused by subscriptions, redemptions and/or switches in and out of the Sub-Fund. This is known as "dilution". In order to counter this and to protect Shareholders' interests, all the Sub-Funds of the Fund may apply "swing pricing" as part of its daily valuation policy. This will mean that in certain circumstances the Fund may make adjustments in the calculations of the net asset values per Share, to counter the impact of dealing and other costs on occasions when these are deemed to be significant.

Notes to the financial statements (continued)

as at 30th June 2024

If on any valuation day the aggregate transactions in Shares of a Sub-Fund result in a net increase or decrease of Shares which exceeds a threshold set by the Board of Directors from time to time for that Sub-Fund (relating to the cost of market dealing for that Sub-Fund), the net asset value of the Sub-Fund will be adjusted by an amount (not exceeding 1% of that net asset value) which reflects both the estimated fiscal charges and dealing costs that may be incurred by the Sub-Fund and the estimated bid/offer spread of the assets in which the Sub-Fund invests. The adjustment will be an addition when the net movement results in an increase of all Shares of the Fund and a deduction when it results in a decrease.

The Sub-Funds apply partial swing pricing meaning that the Net Asset Value is swung only when the predetermined net capital activity threshold is exceeded. It is implemented systematically by the Administration Agent. The swing threshold is set by the Committee at a level to ensure that investor flows that represent a significant amount of dilution in the Sub-Fund are captured.

If net-inflows into a Sub-Fund exceed this threshold level, the Net Asset Value per share will be swung upwards by a predetermined amount (the swing factor). The price swing means that subscribing investors contribute to the cost of their transactions by paying more to enter a Sub-Fund. If the net-outflows from a Sub-Fund exceed the swing threshold, the Net Asset Value per Share will be swung downwards by the swing factor and exiting Shareholders will take a reduced amount out of the Sub-Fund.

As at 30th June 2024, no swing pricing was applied.

Note 10 - Changes in investments

The statement of changes in investments for the period in reference to the report is available free of charge upon request at the registered office of the Fund.

Note 11 - Events during the reporting period

Conflict in Ukraine

On 24th February 2022, the Russian Federation initiated an invasion of Ukraine. Following on from this event the Board of Directors of the Fund ratified a circular resolution, dated 1st March 2022, approving the suspension of the determination of the net asset value for East Capital Russia and East Capital Eastern Europe as Sub-Funds of the Fund.

The Global Emerging Markets Sustainable Sub-Fund contained Russian and Russian equity related securities at the time of the closure of the Russian Stock Exchange representing 2.58% of the portfolio. Due to the low exposure the Board of Directors decided not to suspend the determination of the net asset value and apply fair value pricing (see Note 2 - Valuation of Russian and Russian related equity securities) for the relevant securities.

As at 30th June 2024, the Russia Sub-Fund remains suspended while the Eastern Europe Sub-Fund has been reorganised in September 2023.

Important information regarding the Indicative NAV

The Indicative NAV is not mandatory information to be disclosed under the applicable prospectus and the Board of Directors has no obligation to prepare, distribute or publish indicative NAVs.

The Board of Directors and the Management Company, together with the Central Administration Agent have used their best efforts in the calculation of the indicative NAV and the calculation of the indicative NAV has been done based upon the sources and materials that the Board of Directors believes to be up-to-date, accurate and reliable. However, due to the nature of indicative NAVs and the uncertainties presented by the current situation on the Russian market, the Board of Directors cannot guarantee or warrant the indicative NAV's completeness, integrity, accuracy or timeliness. The indicative NAV may not reflect the actual value of the underlying assets of the Fund or subsequent changes in the market values or prices or any other factors relevant for its determination. This variance may be substantial.

Russian and Russia-related equity securities transactions

The Investment Manager has remained diligent and active during the financial year.

In relation to Russian and Russia-related equity securities the Investment Manager has been able to trade, to a limited extent, in such securities since the suspension. These transactions have typically taken place in deposit receipts of Russian companies listed outside of Russia or in locally listed shares on an OTC (over-the-counter) basis. The OTC transactions were carried out through brokers. All transactions executed in Russian and Russia-related equity securities have been performed in compliance with the regulatory and sanctions framework applicable at the time and with the objective to seek maximum value for shareholders. During 2024, the sales of Russia-related equity securities- MD medical and TCS Group were executed.

On 13th February 2024 the valuation of Russian and Russian related equity securities has been reviewed. A 100% valuation haircut has been applied to assets listed as sanctioned. A 99.99% valuation haircut is maintained on unsanctioned NSD-deposited assets.

The prospectus of East Capital was updated on the 29th of March 2024.
