General market comment

Overview

Stocks had another excellent year. Major indexes set new records in 2024, and world equity markets rose 18% despite fears of a recession, inflation, elections, and global conflicts. This growth was driven by continued economic strength, especially in the US. amid easing monetary policies, and robust corporate earnings, particularly in the technology sector. The IMF's global growth projections for 2025 and 2026 remain at 3.3%, consistent with previous forecasts, though below the historical average of 3.7%. Nevertheless, the IMF has continued raising its US GDP growth forecasts for 2024 and 2025 to 2.8% and 2.7% respectively, surpassing the growth expectations of other developed market peers. In China, GDP estimates for 2024 and 2025 are 4.8% and 4.6% respectively, below long-term trends but continued to be driven by booming high-tech exports and green energy initiatives, despite ongoing challenges in the real estate sector and potential global trade tensions.

Developed markets were up 19% and outperformed emerging markets (+ 8%), driven by a 25% surge in the US market. The US economy dodged a downturn, and interest-rate cuts were widely anticipated, coming as expected at the end of the year. The artificial intelligence (AI) boom continued to broaden, reaching other sectors, and fuelled stock markets in the US and Taiwan. Solid earnings in the 4Q 2024 supported the US market, with companies reporting 22% EPS growth above estimates. The Fed's rate cuts in the second half of 2024 were clearly a positive for the market, boosting investor confidence and supporting economic growth. However, concerns emerged later on, triggered by Trump's 2.0 tax cuts and deregulation policies, as investors feared potential overheating and inflationary pressures. Trade tensions between the US and China escalated further after the Trump election, causing markets to worry about their impact on global supply chains and market stability. Europe underperformed with a 3.1% return due to subdued growth in the EU and Germany. The market is waiting for the German fiscal stimulus to boost the economy in 2025. In terms of global sector performance, IT and Communication Services continued to outperform each with a 32% return. Materials dropped 8.1%, while healthcare, energy, and Consumer Services gained just 1.1%, 1.7%, and 4.1%, respectively.

Emerging markets lagged behind developed markets, with MSCI EM returning 8%. The main reason for the weakness was Brazil, Mexico and Korea down 30%, 29% and 20%, respectively. Latin America's underperformance was largely due to self-inflicted wounds by the countries' politicians that hurt the currency and the equity markets. While the political and geopolitical situation in South Korea has deteriorated rapidly in 2024, with the imposition of martial law and escalating tensions with North Korea. In contrast, the Chinese market surged by 19.4% by the end of the year, outperforming both emerging and developed markets, which may have come as a surprise to most people. This reflects the improved outlook for China in the second half of 2024, as the government clearly understands how bad the situation is and has acted forcefully to address the key issues. At the very least, their actions demonstrate a clear commitment to addressing the situation, providing a stabilizing influence on the stock market. It seems that the government will take the necessary steps, albeit at a pace that may not meet some investors' expectations. India has underperformed by 2.8% as the country enters a cyclical slowdown amid lower government spending, which is typical of election years. Taiwan stands out as the clear leader, with a return of 35%, propelled by TSMC's substantial growth. TSMC's high-margin AI chip production for Nvidia has led to significant earnings and a market capitalization of USD 1 trillion. Eastern Europe, as a region, underperformed EMs gaining just 7%.

Performance in [USD] unless otherwise stated.

Note: The information in this report represents historical data and is not an indication of future results.

Management report

The Fund gained 15% during the year (in SEK). The net asset value was 166m SEK as of 31 December 2024, to be compared to 177m SEK as of 31 December 2023. Net outflows during the year amounted to 35m SEK.

The Fund's changes during the period

Multi-Strategy started the year with an allocation to equities of 67% and ended the year with an allocation to equities of 63%. Within equities, we held exposure mainly in emerging markets in Asia and Eastern Europe. Within fixed income, exposure mainly consisted of corporate bonds with shorter duration and a limited exposure to long-duration.

The Fund's risk exposure

The Risk/Reward indicator presented in the Fund's KID shows the causality between risk and possible performance an investment in the Fund entails. The indicator is based on how the Fund's value has changed during the past 5 years. East Capital Multi-Strategi has been assigned a summary risk indicator (SRI) value of 3 which indicate medium low risk for both increases and decreases in value. The Fund's risk category can change as it is based on historical data and is not a guarantee for future Risk/Reward.

Investments in funds are always associated with risks. The Fund may both increase or decrease in value, and there is no guarantee that investors will recoup all of their invested capital. The primary risks are market risk, foreign exchange risk, liquidity risk, credit/counterparty risk, operational risk and investment risk.

The Fund's liquidity risk may increase when portion of the fund is invested in instruments that could experience deteriorating liquidity during stressful market situations. Low liquidity can result in challenges or even impossibility to buy or sell instruments within a reasonable timeframe, leading to potential price deviations from expected levels.

The Fund's currency risk entails a risk for changes in underlying currencies of financial instruments held by the Fund. In countries where the Fund invests and where the currency deviates from the SEK the following applies:

- For equity investments, the foreign exchange exposure is not hedged
- For investments in fixed income instruments, the Investment Manager may hedge the foreign exchange exposure.

Other risks that can affect the value of the Fund are:

- Credit/Counterparty risk, the risk that an issuer or counterparty in a financial transaction cannot meet its obligations. The Fund invests in fixed income instruments e.g. bonds. If an issuer of such an instrument cannot pay the interest or the nominal amount the investment can lose parts of, or its whole value.
- Interest rate risk, the fund invests a significant part of its assets in fixed income instruments which are affected by market interest rates' general developments.
- Operational risk, the risk of loss caused by operational functions, e.g. IT systems, management, depositary and administration.
- Investment risk, emerging markets: The Fund seeks, directly or indirectly exposure to companies and issuers located in emerging markets. Investors should be aware that these investments are connected with higher risk than investments in instruments from issuers in more developed countries. Investments in emerging markets can be volatile and illiquid and a fund's investments in such markets can be subject to delays in divestment. Also, there can be a higher risk of political, economic and social instability and negative changes in governmental policies and laws in emerging markets.

The Fund's assets can also be negatively affected by fluctuations in foreign exchange rate, currency controls and taxation.

Investments in derivative instruments may only be made for the purpose of hedging the risk of the portfolio. The commitment approach is used to estimate the Fund's global exposure by measuring its exposure to derivative instruments.

Objective

The investment objective of East Capital Multi-Strategi is to provide a combination of long-term capital growth and interest income.

The Fund pursues risk diversification through active asset allocation and by investing, indirectly through fund units or directly, in equities and debt securities globally and will actively seek exposure to emerging markets to draw on the Investment Manager's extensive knowledge and experience in these markets.

Long term capital growth means the growth expected of fund investments over a period of five years.

Investment Policy of the Fund

The Fund will invest at least 30% and at most 80% of its assets directly in debt securities or indirectly through the use of UCITS or other UCIs which in turn invest in debt securities. The Fund will further invest at least 20% and at most 70% of its assets directly in equities and equity related securities or indirectly through the use of UCITS or other UCIs in equities and equity related securities.

Cash position can range between 0-50% of the Fund's net assets, however any higher allocation to cash is expected to be temporary, for example following larger inflows to the Fund or during extreme market conditions.

The Fund's investment focus is global and diversified and as such unrestricted in terms of industry, geography, sector and market capitalisation.

Emerging Markets are defined as countries not classified as developed by the recognised major indices, or which are considered as low or middle income countries by the World

Important Note

Pursuant to the Swedish Investment Fund Act (2004:46), East Capital Asset Management S.A. has been appointed to act as Management Company of the Fund.

Note: All performance figures in the management report are in SEK unless otherwise stated.

^{*} The annual report and half year report of the Fund are available at the registered address of the Management Company.

East Capital Multi-Strategi Special note to the Financial Statements as at 31 December 2024

Conflict in Ukraine

On February 24, 2022, the Russian Federation initiated a military conflict in Ukraine leading to closure of the Russian Stock Exchange on 25 February. As of this date the fund contained Russian and Russian related equity securities representing 3.16% of the portfolio. Due to the low exposure the Board of Directors of the Management Company decided not to suspend the determination of the net asset value and apply fair value pricing (see below – Valuation of Russian securities) for the relevant securities.

Valuation of Russian and Russian related equity securities

The valuation instructions for Russian and Russian related equity securities at the date of the Financial Statements are outlined below:

Classification - Statement of investments and other net assets (in EUR)	Condition	Instruction
Shares - Russian and Russian related (inaccessible)* - assets listed as sanctioned	Securities listed on exchanges domiciled in the Russian Federation	100% valuation haircut applied

^{*}Inaccessible is defined as securities which are currently not possible for the fund to trade over the local market of listing.

SFDR Disclosure

In accordance with the requirements of the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27th November 2019 on sustainability-related disclosures in the financial services sector (the "SFDR") as amended and as complemented by regulatory technical standards (RTS), it is noted that for the Fund:

- East Capital Multi-Strategi

referred to under article 8, the required (unaudited) RTS annex to the periodic report is presented on the pages at the end of this report.

Management Company

East Capital Asset Management S.A., a wholly-owned subsidiary of East Capital Holding AB Corporate identity number: B 136364, incorporated 29 January 2008 Share capital: EUR 1,000,000 Address: 11, rue Sainte-Zithe, L-2763 Luxembourg Phone: +352 2686701 Fax: +352 26684717 E-mail: luxembourg@eastcapital.com Internet: www.eastcapital.com

Board of the Management Company

Karine Hirn, Chairperson of the Board Peter Elam Håkansson, Board Member Albin Rosengren, Board Member

Senior management of the Management Company

Management Committee: Lucija Devetak, Conducting Officer Jean-Christophe Esteve, Conducting Officer Christian Karlsson, Conducting Officer Kevin Wu, Conducting Officer (until 28.08.2024) Dimitrios Sakellaris, Conducting Officer (since 29.08.2024)

Depositary

Skandinaviska Enskilda Banken (publ)

Supervisory authority

The Fund(s) are authorised in Sweden and regulated by the Swedish Financial Supervisory Authority, Finansinspektionen. East Capital Asset Management S.A. is authorised in Luxembourg and regulated by the Luxembourg supervisory authority, Commission de Surveillance du Secteur Financier (CSSF).

Legal Status of the Fund(s)

The Fund(s) are mutual funds pursuant to the Mutual Funds Act (Swedish Code of Statutes 2004:46). The Fund(s) cannot acquire rights or assume obligations, but are represented by the Management Company.

Auditor

Märten Asplund, Authorised public accountant KPMG AB. An agreement concerning the exchange of information and coordination has been entered into between the Fund(s) auditor and the Master Fund Company's auditor.

Reporting principles

This Annual Report has been prepared in accordance with the Investment Funds Act (SFS 2004:46), the Swedish Financial Supervisory Authority's regulations on investment funds (FFFS 2013:9) and the Swedish Investment Fund Association's recommendations for the reporting of key performance indicators pertaining to investment funds.*

The value of any cash in hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received are deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof is arrived at after making such discount as the Fund(s) may consider appropriate in such case to reflect the true value thereof.

Securities admitted to official listing on an official stock exchange or traded on any other organised market are valued at the last available reliable price on such stock exchange or market, unless such a price is not deemed to be representative of their fair market value.

The financial derivative instruments which are not listed on any official stock exchange or traded on any other organised market are valued in accordance with market practice.

Fund Shares/Units in undertakings for collective investment in transferable securities ("UCITS") are valued at the latest price determined and obtained from the Master Fund. Both unrealised and realised profits and losses are reported in the accounts.

The Fund(s) holdings in shares and other financial instruments have been valued with prices taken at 22.00 CET.

 $\ensuremath{^*}$ Assets and liabilities are reported at their fair value.

Term definitions

Active risk (tracking error), as reported in this annual report, describes how much the total return of the Fund(s) deviates from the return of its benchmark index. It is an indication of how active the manager has been, where a high value is an indication of active management and a low value is an indication of passive management.

Active share is to give the investors an understanding of the activity of a specific fund and should be seen as a complement to the key ratios, for example tracking error and return comparisons against a benchmark.

The turnover rate is a measurement of the proportion of the Fund(s) which is traded over a period of time. It indicates how short or long-term the management perspective is by reflecting the length of time that a security remains part of the

Fund(s). It is calculated by adding all purchases and sales respectively for a given period and then dividing the lowest total by the average of the Fund(s) assets under management.

Ongoing charges is total costs excluding transaction costs, expressed as a percentage of the average of the Fund(s) assets under management.

Total risk (standard deviation) is a measure of the fluctuations in the Fund(s) total return over a set period of time. The higher the value, the higher the risk.

Remuneration disclosure

Remuneration is set in accordance with East Capital Group's Remuneration Policy and applicable laws and regulation. A copy of the Remuneration policy is available on the East Capital Group webpage. No material changes were made to the Policy during the reporting period.

Remuneration and benefits include e.g. cash salary and other cash remuneration, or instruments with the same characteristics as a mutual fund, pension provisions, severance pay or car benefits.

The implementation of the remuneration policy is regularly reviewed by an independent internal audit to ensure compliance with the remuneration guidelines and procedures established by the Board of Directors of East Capital Asset Management S.A. The latest review in 2024 does not show any significant shortcomings, but resulted in minor recommendations on the process and presentation of information in the annual report.

ECAM S.A.

Amounts in EUR, unless otherwise stated.

`ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: East Capital Multi-Strategi Legal entity identifier: 529900HU0KNZU8HH6439

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
• • Yes	• No			
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 64,27% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an

environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Environmental and social characteristics promoted by this Sub-Fund were considered and addressed via our proprietary ESG analysis, which includes an ESG and SDG assessment.

addressed via our proprietary ESG analysis, which includes an ESG and SDG assessment. Environmental characteristics include, but are not limited to the reduction of greenhouse gas emissions and the transition to a Net Zero economy, improved energy efficiency and increased use of renewable energy sources. Examples of social characteristics promoted by this Sub-Fund include gender diversity, responsible supply chain management and protection of labour rights, and health and safety issues.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

To structure the review of relevant and material ESG risks and opportunities promoted, the Investment Manager uses a proprietary ESG Scorecard which comprises a Red Flag Analysis and ESG related questions, some of which consider the principal adverse impacts (PAI) indicators. The ESG Scorecard also has an SDG module to assess revenue alignment with the UN Sustainable Development Goals (SDGs). The weighted equity average environmental and social score of the fund was 83,8 and 88,6 respectively. Moreover, the weighted average equity ESG score was 78,2 as of 31 December 2024. 27,2% of the Sub-Fund's NAV addressed at least one environmental SDG and 46,9% addressed at least one social SDG.

...and compared to previous periods?

The weighted equity average environmental and social scores of the fund improved/decreased by 4,2% and -0,6%, respectively, compared with last year's portfolio as of year-end 2023. Additionally, the weighted equity average ESG score improved by 0,5% during the same period. The Sub-Fund's contribution to at least one environmental and one social SDG increased by 3,7% and 2,4% respectively.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-Fund intended to make included environmental objectives, such as improved energy efficiency, increased use of renewable energy, reduced greenhouse gas emissions and other environmental objectives as outlined in the UN SDGs. Social objectives included tackling inequality and strengthening labor relations and other social objectives as outlined in the UN SDGs.

The sustainable investments contributed to the environmental and social objectives by directly addressing any of the objectives in their operations, by enabling such activities, or by themselves being part of the transition through changing their practices and policies (for example, by reducing greenhouse gas emissions). The contribution to the environmental and social objectives are included and reflected in the proprietary ESG Score. Please refer to the Asset allocation section to see the proportion of sustainable investment for the Sub-Fund.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager ensures that any sustainable investments do not cause significant harm through the Red Flag Analysis, norms-based (controversy)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

screening, and sector-based screening, which are all part of the "Three-Step-Test" for defining sustainable investments. The Red Flag Analysis consists of a set of questions which the Investment Manager deems to be crucial to consider for ensuring that investments do not cause significant harm. The questions are related to corporate governance, ethics, and corruption, and also cover international norms and standards, as well as severe and/or systematic environmental or social controversies. One question specifically addresses the the Principal Adverse Impact (PAI) indicators, which are outlined in Annex I of Regulation (EU) 2019/2088. In order to assess the PAI indicators, the Investment Manager incorporates data from an external service provider that compares the PAI indicators for each company with a range of peer companies.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts are included in the Investment Manager's proprietary ESG Scorecards, which are completed by the Investment Manager and verified by the ESG function, and in the norms-based screening.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of the controversy (norms-based) screening, companies are assessed in terms of compliance with international norms, standards and underlying conventions. The controversy (norms-based) screening is intended to capture severe, systemic and structural violations of international norms as enshrined by the UN Global Compact Principles. The assessments are underpinned by references to the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as well as their underlying conventions.

Upon new investment during the year, the Investment Manager confirmed the status of the new holding in regard to norms and controversies. The ESG function also verified the compliance of the Sub-Fund portfolio quarterly; this process highlights any company identified on the Watchlist or assessed as Non-Compliant. This review process is based on the results of the norms-based screening, information that has been publicly disclosed by issuers, as well as other relevant information that may have come to the attention of the Investment Manager. No company in the Sub-Fund was assessed as non-compliant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Analysts and portfolio managers are responsible for considering PAI indicators when holistically assessing company quality and for answering the PAI-related question in the Red Flag Analysis, pre-investment. In case the PAI indicators are not available, analysts and portfolio managers are expected to make their best efforts to ensure that there are no unacceptably high risks related to principal adverse impacts on sustainability factors. The Sub-Fund considered principal adverse impacts on sustainability factors on a best effort basis given limitation in data availability.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024-12-31

Sector	% Assets	Country	
Information Technology	4.59%	Taiwan

What was the proportion of sustainability-related investments?

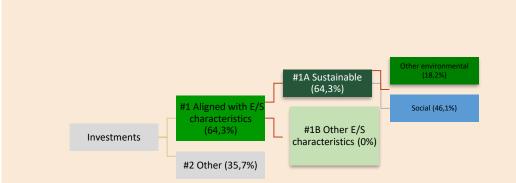

The proportion of Sustainable investment was 64,3% as of 31 December, 2024.

Asset allocation describes the share of investments in

specific assets.

What was the asset allocation?

The proportion of investments aligned with E/S characteristics and Other, amounted to 64,3% and 35,7% respectively. The proportion of Sustainable investments and Other E/S characteristics amounted to 64,3% and 0% respectively. Moreover, the split between Other environmental, 18,2% and Social investments 46,1% was tilted towards sustainable investment with a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

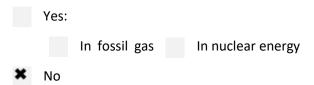

Sector	Weights
Financials	39%
Consumer Discretionary	16%
Information Technology	9%
Industrials	7%
Real Estate	7%
Communication Services	6%
Utilities	6%
Health Care	3%
Government	2%

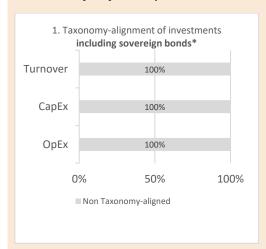

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

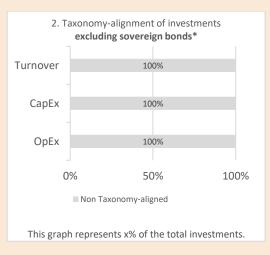

Given the evolving methodology and lack of detailed disclosure, the Investment Manager have chosen not to calculate alignment with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Not applicable. The Investment Manager did not assess that any investments were made in transitional or enabling activities, partly due to the evolving methodology and lack of detailed disclosure.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy amounted to 18,2%.

sustainable

sustainable

investments with an environmental

objective that do not take into account the criteria

for environmentally

economic activities

under Regulation

(EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments amounted to 46,1%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash positions necessary for ancillary liquidity. Furthermore, investments included under "other" are investments the Investment Manager classifies as not sustainable or as aligned with E/S characteristics, where there is a very compelling investment rationale to do so and/or companies that were not covered by an ESG analysis. Assets included under "other" were instruments involved in activities related to Real Estate Operating Companies, Environmental & Facilities Services, Wireless Telecommunication Services, Diversified Banks, Real Estate Management & Development, Commercial & Residential Mortgage Finance, Electric Utilities, Asset Management & Custody Banks, and Leisure Facilities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability considerations were integrated into the investment process through East Capital's sustainability analysis, which is a key part of the broader company evaluation framework. The fund's investments were assessed against East Capital's sustainability criteria, including the consideration of Principal Adverse Impact (PAI) indicators. Additionally, investments were screened based on East Capital's exclusion criteria. These measures supported the fund's alignment with its environmental and social objectives.

East Capital's active ownership strategy has been instrumental in promoting companies' positive contributions to sustainable development. Through engagement dialogues, we have communicated our expectations regarding various sustainability topics, driving change within the companies. These discussions addressed key adverse impacts and East Capital's focus areas. For instance, we encouraged companies to adopt emissions reduction targets to support the goals of the Paris Agreement. Such dialogues are critical tools for fostering sustainable development.

Additionally, we participated in CDP's 2024 Non-Disclosure Campaign, aiming to encourage corporations to disclose information related to climate, forests, and water through CDP's integrated questionnaire. This initiative seeks to collect a comprehensive set of self-reported corporate environmental data globally, providing critical insights to enable informed decision-making by businesses and investors.

The fund also participated in shareholder meetings, voting in alignment with East Capital's stewardship principles. These efforts reflect East Capital's commitment to integrating sustainability into its investment process and promoting responsible business practices while actively contributing to long-term sustainable development.
